WHO WE ARE

IdeaPros is the first company in the world designed to take entrepreneurs every step of the way, from raw, brilliant idea to robust, profitable organization. Our Founders have been advising, building, financing, and getting amazing companies to market for over 30 years – and now they want to work with savvy entrepreneurs who know that a strategic partner is the key to victory. Only IdeaPros can help you at every step of the journey to success.

PROCESS

It can be described as intense. We validate your concept, and help you position it in a way that people will want to buy it at a price-point that is profitable, and to the detriment of your competitors. We sell your product before we make it! And that’s just the beginning!

WHAT WE DO

We put structure around your amazing ideas. Whether you are at the visualization stage or you are already making sales, we partner with you to position your organization for maximum success. Using a unique evidence-based approach, we help organize your company, your product(s), and your positioning to set you apart from the rest. And we can arrange sales, pre-sales, crowdfunding, or other financial events to give you the leverage and capital you need to build your company. From helping you build out that back-of-the-napkin idea, to arranging prototypes, contract manufacturing, distribution, direct web sales, big box retailers, and ongoing financing resources, IdeaPros is the last partner you’ll ever need. Your search stops here!
